## CLASSES IN PENMANSHIP

*In the Commercial Department of the Academy are now organized and ready for the reception of pupils. We wish to call the attention of Citizens to the rare opportunities here offered for the acquisition of this beautiful Art. The system taught, is the most legible, rapid and elegant extant, and it has, wherever known, superseded all others. Pupils soon acquire a remarkable proficiency in its execution and a real pleasure in its practice. Instruction will be given from the first principles to an extended graduating course. The Department at present occupies Rooms in the Court House building near the entrance, fitted up in an attractive style. The rooms will be open during School hours for all who may wish to attend, and an Evening Class will be formed if a sufficient number can be obtained. Special arrangements will be made with those desiring private instruction.*
